SUMMARY

Senior Software Engineer & System Architect with 5+ years building multi-tenant SaaS and ERP platforms with Node.js, NestJS, Angular and TypeScript on MongoDB, Redis, Docker and AWS EC2. Creator and Principal System Architect of OpsX (opsx.in), an industrial ERP and workforce OS for Indian SMEs — owned from architecture to production. Previously led multi-tenant B2B/B2C travel SaaS at EasyRes: RBAC, pricing and wallet systems, and mentoring junior developers.

WORK EXPERIENCE

OpsX (opsx.in) — Opsx Apex Private Limited, Gaya 2026 – Present
Principal System Architect & Product Creator

- Created OpsX, a multi-tenant industrial ERP and workforce OS: attendance, payroll, field staff, factory kiosk, procurement and stock.
- **Edge computing:** offline-first SQLite queue on Android with store-and-forward batch sync; on-device face verification on kiosk tablets — no image leaves the device.
- **Geofenced attendance** and field tracking with live maps, trips and proof of delivery.
- **Tenant isolation & RBAC:** a dedicated MongoDB database per tenant, a tenant-scope layer that pins every write, hierarchical entitlements and maker-checker approvals.
- **Automated payroll:** PF, ESI, TDS, professional tax, arrears and full & final, posted to a double-entry general ledger in PostgreSQL through an outbox.
- Runs in production on AWS EC2: NestJS API on two instances with rolling restarts, BullMQ workers on Redis, Socket.IO realtime, nginx; React Native (Expo) field and kiosk apps.

EasyRes Travel Technologies Pvt. Ltd., Delhi Jun 2022 – Present
Software Development Engineer II (Full Stack), Jul 2024 – Present · Frontend Lead / Full Stack Engineer, Jun 2022 – Jul 2024

- Led development of a multi-tenant SaaS travel platform supporting B2B & B2C users.
- Designed and implemented RBAC for subscribers, agencies, agents and consumers.
- Owned end-to-end feature delivery (Admin → API → Consumer UI) for Holiday, Ferry, Visa and Insurance modules.
- Built agency–agent hierarchy, pricing markup rules, grade plans and wallet systems.
- Integrated third-party travel APIs for real-time pricing and availability.
- Improved application performance by ~30% via Angular optimization and API tuning.
- Mentored 3–5 junior developers, conducted code reviews and enforced best practices.

VKREATE Software Technologies Pvt. Ltd., Jaipur Jan 2021 – May 2022
Frontend Developer

- Developed and maintained production CRM dashboards using Angular.
- Integrated REST APIs for real-time data visualization and reporting.
- Improved UI performance and usability for business users.

PROJECTS

OpsX — Industrial ERP & Workforce OS · opsx.in
NestJS, Node.js, Angular, TypeScript, MongoDB, PostgreSQL, Redis, BullMQ, React Native, Docker, AWS EC2

- Architecture for edge-first attendance, geofencing, RBAC and automated statutory payroll across tenants (see above).

Travel SaaS Platform — B2B/B2C & Admin Portals (EasyRes, private platform)
Angular, TypeScript, Node.js, REST APIs, SQL/NoSQL

- Multi-tenant travel ecosystem with Master Admin, Subscriber Admin and Consumer portals; admin modules for agency management, pricing, wallets, contracts and CMS.
- Booking flows for Flights, Hotels, Ferry, Holidays, Visas, Insurance and Airport Transfers; frequent flyer and traveler profiles for faster checkout.

TECHNICAL SKILLS

Backend & Architecture: Node.js, NestJS, Express, TypeScript, REST APIs, Microservices, Multi-Tenant ERP, RBAC, event-driven (outbox, queues)
Frontend & Mobile: Angular (10–20+), React, React Native (Expo), RxJS, NgRx, HTML5, CSS3, SCSS, Tailwind
Data: MongoDB, PostgreSQL, Redis, BullMQ, MySQL
Cloud & DevOps: Docker, AWS EC2, nginx, Linux, zero-downtime rolling deploys, Git
Domain: Attendance & payroll (PF, ESI, TDS), edge / offline-first apps, travel booking, pricing & wallet systems

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science Engineering, NIMS University, Jaipur 2021
